IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene informacion muy importante sobre su agua potable. Traduzcalo o hable con alguien que lo entienda bien.

Larsen's Office Complex Failed to Sample for Nitrate and Nitrite in 2018

Our water system failed to monitor our drinking water source for the chemicals nitrate and nitrite in 2018, as required by the California Code of Regulations.

Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we did to correct the situation. Please share this information with other people who drink this water, especially those who may not have received this notice directly. You can do this by posting this notice in a public place or giving out copies by hand or mail.

What should I do?

You do not need to take any corrective actions at this time. This is not an emergency. If you have health concerns, you may wish to consult your doctor. General guidelines on regulated contaminants in drinking water are available from EPA's Safe Drinking Water Hotline at (800) 426-4791.

What happened?

We are required by state regulations to monitor our drinking water source for nitrate every year and for nitrite every three years. Results of this monitoring are an indicator of whether or not the drinking water meets health standards for these chemicals. We did not test for nitrate or nitrite during 2018 and, therefore, cannot be sure of the quality of the drinking water at that time.

What does this mean?

We cannot be sure that the level of nitrate and nitrite in our drinking water was below the maximum allowed by law during 2018. Infants under the age of six months who drink water containing too much nitrate or nitrite may quickly become seriously ill and, if untreated, may die because these chemicals can interfere with the capacity of the infant's blood to carry oxygen. Symptoms include shortness of breath and blueness of the skin. High nitrate levels may also affect the oxygen-carrying ability of the blood of pregnant women.

What corrective actions have been taken by the Larsen's Office Complex to prevent this violation from occurring in the future?

This notification of the public is being done in compliance with Sections 64463.4 and 64465, Title 22 of the CCR as a means of keeping the public informed.
